Nuclear Safety Standards Committee

36th Meeting

16 – 18 October 2013

Agenda item 3.6

DPP DS479 Operating Experience Feedback

F. JIANG

Operational Safety Section, Division of Nuclear Installation Safety
Background

- The previous guide published in 2006
- Revision of relevant safety standards and guides
- Proven practices in OE from Member States
- Lessons learnt from Fukushima
The revised safety guide will emphasize the role of management and their commitment to the utilization of the OE program in enhancing safety performance and safety culture.

Management expectations need to be clear for outcome of the identification, screening, analysis and each element of the OE process.

Management should be committed to the timely implementation of correctives actions from relevant operating experience.

Comments

- Most of comments are accepted (~84 %)
- Those comments, which were not taken into account do not have a fundamental, meaningful impact on the DPP.
Comments (Examples)

- The review and updating, as necessary, of IAEA Safety Guide NS-G-2.11, “A System for the Feedback of Experience from Events in Nuclear Installations,” (2006) should be formally coordinated with the Organization for Economic Cooperation and Development/ Nuclear Energy Agency (NEA)/ Committee on Nuclear Regulatory Activities/ Working Group for Operating Experience (WGOE) and the community of IAEA/NEA International Reporting System for Operating Experience (IRS) National Coordinators (NC). (Rejected)

- Reason: This DPP was distributed to all the Member States and relevant organizations for comments, all inputs were solicited and considered on a prudent basis.
Thank you for your attention!
