- Feedback from Fissile correspondence WG [2]  
- Discussion - proposals for change: Transitional Arrangements  
- TRANSSC31 (2 – 6 November 2015) | | | | | |

**Notes**

[1] The proposed changes relating to A1 / A2 will be discussed in the meeting held in Cologne (GRS Offices) 3 -4 September. Further details contact Uwe.Buettner@grs.de / Florence.Sentuc@grs.de

[2] The proposed changes relating to fissile and criticality requirements will be discussed in a correspondence working group prior to this meeting; further details to be announced.

**Meeting rooms** for the working groups will be allocated on the first day (Monday).

**Documents for Working Groups:** All documents have been loaded to the TRANSSC Members Area [http://www-ns.iaea.org/committees/transsc/Extra Ordinary Meeting](http://www-ns.iaea.org/committees/transsc/Extra Ordinary Meeting)

**Additional clarification:** Following the initial review by working groups in TRANSSC 30, there were a number of proposals that require additional clarification and the originators of these proposals have been contacted. The additional clarifications received will be provided to this meeting.

**Working Group reports:** Open and detailed discussion on each proposal is encouraged and a detailed record of the discussion and conclusion reached is to be made on the working group document provided. If TRANSSC 31 decides to revise SSR-6 and SSG-26 then the outputs from each working group will form the record of this revision process in the Technical Basis Document.
