Decisions by the criticality
TTEG
6 June 2018
Elect Chair and Secretary

Proposal:

Chair: Mathieu MILIN
Secretary: Benjamin RUPRECHT
Identify draft workplan

During the Criticality WG meeting before TRANSSC34, TRANSSC35 and TRANSSC36, our discussions could be divided into 3 parts. As these discussions were very constructive, the Criticality TTEG decided to conserve these tasks as draft workplan:

- Task 1: to have open discussions about issues for the transport of fissile material (these discussions could lead to propose modification of SSR-6, SSG-26 for the next revision cycle) ➔ correspond to the intention of CWG-35-1.

- Task 2: to share our practices on the transport of fissile material by the creation of a questionnaire ➔ correspond to CWG-35-2.

- Task 3: to provide technical information for the TBD ➔ correspond to CWG-35-3.
Agree priorities and work methods

There is no need, at the moment, to create a priority between these 3 tasks.

Concerning the work methods, we could conserve the actual work methods of the Criticality WG and add the use of the Sharepoint. We identify that the Sharepoint might help us to:

- Have exchange with people who can’t attend to the Criticality WG meeting;
- Have better exchange about our ongoing work;
- Collect the technical information.
Thank you for your attention!
