DISCLAIMER

The information contained in this document cannot be changed or modified in any way and should serve only the purpose of promoting exchange of experience, knowledge dissemination and training in nuclear safety.

The information presented does not necessarily reflect the views of the IAEA or the governments of IAEA Member States and as such is not an official record.

The IAEA makes no warranties, either express or implied, concerning the accuracy, completeness, reliability, or suitability of the information. Neither does it warrant that use of the information is free of any claims of copyright infringement.

The use of particular designations of countries or territories does not imply any judgment by the IAEA as to the legal status of such countries or territories, of their authorities and institutions or of the delimitation of their boundaries. The mention of names of specific companies or products (whether or not indicated as registered) does not imply any intention to infringe proprietary rights, nor should it be construed as an endorsement or recommendation on the part of the IAEA.
Nuclear Safety after Fukushima

Gustavo Caruso
Head, Nuclear Safety Action Plan
Department of Nuclear Safety and Security
Process

- IAEA Ministerial Conference
- September Board of Governors
- Action Plan on Nuclear Safety
- General Conference
- Action Plan Implementation
- Initially: CNS Extraordinary Meeting and BoG 2012 and GC
The IAEA Ministerial Conference

• Director General made five proposals:
  • to strengthen IAEA Safety Standards;
  • to systematically review the safety of all nuclear power plants, including by expanding the IAEA’s programme of expert peer reviews;
  • to enhance the effectiveness of national nuclear regulatory bodies and ensure their independence;
  • to strengthen the global emergency preparedness and response system; and,
  • to expand the Agency’s role in receiving and disseminating information.
Working Sessions

• **WS 1**: Preliminary assessment of the accident at TEPCO’s Fukushima NPSs and actions for safety improvement

• **WS 2**: Emergency preparedness and response

• **WS 3**: The global nuclear safety framework
Major themes for strengthening nuclear safety

- The IAEA Safety Standards
- The Safety of NPPs
- Peer review mechanisms
- EPR Framework
- International cooperation
- Global nuclear safety framework
At the conference a Ministerial Declaration was adopted which inter alia:

• Requested the IAEA Director General to prepare a Report on the June 2011 IAEA Ministerial Conference on Nuclear Safety and a draft Action Plan, and to promote coordination and cooperation, as appropriate, with other relevant international organizations to follow up on the outcomes of the Conference, as well as facilitate consultations among Member States on the draft Action Plan”;

• Requested the IAEA Director General to present the Report and the draft Action Plan covering all the relevant aspects relating to safety, to the IAEA Board of Governors and the General Conference at their forthcoming meetings in 2011”;

• Called upon the IAEA Board of Governors and the General Conference to reflect the outcome of the Ministerial Conference in their decisions and to support the effective, prompt and adequately resourced implementation of the Action Plan”.

IAEA
International Nuclear Safety Group

Communication dated 26 July 2011 from the Chairman of the INSAG – GOV/INF/2011/11

“to provide recommendations in connection with the Ministerial Conference on Nuclear Safety regarding future actions to be taken”
International Nuclear Safety Group

Part I: the responsibilities for ensuring safety

Part II: Substantive issues that arise from the Fukushima accident

Part III: INSAG recommendations, focusing on recommendations directed at the IAEA and the Member States
Part I:
Every participant in this overall framework has the responsibility after the Fukushima accident to determine changes that should be made in its activities in order to address the safety vulnerabilities that the accident has revealed.
International Nuclear Safety Group

Part II:

- Regulatory Structure
- Chain of Command
- Extreme Events
- Severe Accidents
- Station Blackout
- Loss of Heat Sink
- Explosive gases
- Spent Fuel Pools
- Emergency Planning
International Nuclear Safety Group

Part III:

- Safety standards
- Peer Review Services
- International Emergency Preparedness and Response
- International Conventions
- International Safety Research
- Remediation

Other Matters:

- New entrant countries
- Operating Experience
Action Plan on Nuclear Safety
The objectives of the Nuclear Safety Action Team as defined by the Director General in his statement to the Board of Governors on 26 September 2011 is to oversee prompt implementation of the Action Plan and ensure proper coordination among all stakeholders.
The scope of the project is to oversee prompt implementation of the Action Plan as defined in the document GOV/2011/59-GC(55)/14. Date: 5 September 2011. This will include oversight and coordination of activities within the IAEA Secretariat and with all relevant stakeholders.
Nuclear Safety Action Team: methods

- Action Plan (AP) team to discuss the general approach with DDG NS and DGO and to agree on the staff to be made responsible for each action/sub action.
- AP team will serve as focal point with all activities associated with the implementation of the action plan.
- AP Team and designated staff (the core group) from NS and NE to elicit the relevance of sub actions to be undertaken by MS and their impact on the implementation of the sub actions under IAEA scope of work. This includes determining the scope and contents of the information to be requested from MS.
In considering this Action Plan, it is important to note that:

The safety **responsibility** lies with each Member State.

The IAEA **Safety Standards** provide the basis for what constitutes a high level of safety.

**Transparency** in all aspects of nuclear safety through timely and continuous sharing and dissemination of objective information.

**Further lessons** may be learned and, as appropriate, be incorporated into the proposed actions by updating the Action Plan (2012 Conference).

The Agency’s prompt and effective implementation of activities under the Action Plan **will be funded through prioritization and continuing efficient use of resources** from the regular budget, and through voluntary contributions of extra budgetary resources.
Action Plan on Nuclear Safety

Safety assessments in the light of the accident at TEPCO’s Fukushima Daiichi Nuclear Power Station

**Undertake assessment of the safety vulnerabilities of nuclear power plants in the light of lessons learned to date from the accident**

- **Member States** to promptly undertake a national assessment of the design of nuclear power plants against site specific extreme natural hazards and to implement the necessary corrective actions in a timely manner.
- The IAEA Secretariat, taking into account existing experiences, to develop a methodology and make it available for Member States that may wish to use it in carrying out their national assessments.
- **The IAEA Secretariat, upon request**, to provide assistance and support to Member States in the implementation of a national assessment of the design of nuclear power plants against site specific extreme natural hazards.
- The IAEA Secretariat, upon request, to undertake peer reviews of national assessments and to provide additional support to Member States.
IAEA peer reviews

*Strengthen IAEA peer reviews in order to maximize the benefits to Member States*

- The IAEA Secretariat to strengthen existing IAEA peer reviews by incorporating lessons learned and by ensuring that these reviews appropriately address regulatory effectiveness, operational safety, design safety, and emergency preparedness and response; Member States to provide experts for peer review missions.
- The IAEA Secretariat, in order to enhance transparency, to provide summary information on where and when IAEA peer reviews have taken place, and to make publicly available in a timely manner the results of such reviews with the consent of the State concerned.
- **Member States to be strongly encouraged to voluntarily host IAEA peer reviews**, including follow-up reviews, on a regular basis; the IAEA Secretariat to respond in a timely manner to requests for such reviews.
- The IAEA Secretariat to assess, and enhance as necessary, the effectiveness of the IAEA peer reviews.
Action Plan on Nuclear Safety

Emergency preparedness and response

**Strengthen emergency preparedness and response**

- Member States to conduct a prompt national review and thereafter regular reviews of their emergency preparedness and response arrangements and capabilities, with the IAEA Secretariat providing support and assistance through Emergency Preparedness Review (EPREV) missions, as requested.

- The IAEA Secretariat, Member States and relevant international organizations to review and strengthen the international emergency preparedness and response framework.

- The IAEA Secretariat, Member States and relevant international organizations to strengthen the assistance mechanisms to ensure that necessary assistance is made available promptly. Consideration to be given to enhancing and fully utilizing the IAEA Response and Assistance Network (RANET), including expanding its rapid response capabilities.

- Member States to consider, on a voluntary basis, establishing national rapid response teams that could also be made available internationally through RANET.

- The IAEA Secretariat, in case of a nuclear emergency and with the consent of the State concerned, to conduct timely fact-finding missions and to make the results publicly available.
Action Plan on Nuclear Safety

National regulatory bodies

*Strengthen the effectiveness of national regulatory bodies*

- Member States to conduct a prompt national review and thereafter regular reviews of their regulatory bodies, including an assessment of their effective independence, adequacy of human and financial resources and the need for appropriate technical and scientific support, to fulfil their responsibilities.
- The IAEA Secretariat to enhance the Integrated Regulatory Review Service (IRRS) for peer review of regulatory effectiveness through a more comprehensive assessment of national regulations against IAEA Safety Standards.
- Each Member State with nuclear power plants to voluntarily host, on a regular basis, an IAEA IRRS mission to assess its national regulatory framework. In addition, a follow-up mission to be conducted within three years of the main IRRS mission.
Action Plan on Nuclear Safety

**Operating organizations**

*Strengthen the effectiveness of operating organizations with respect to nuclear safety*

- **Member States** to ensure improvement, as necessary, of management systems, safety culture, human resources management, and scientific and technical capacity in operating organizations; the IAEA Secretariat to provide assistance to Member States upon request.

- **Each Member State with nuclear power plants** to voluntarily host at least one IAEA Operational Safety Review Team (OSART) mission during the coming three years, with the initial focus on older nuclear power plants. Thereafter, OSART missions to be voluntarily hosted on a regular basis.

- The IAEA Secretariat to strengthen cooperation with WANO by amending their Memorandum of Understanding to enhance information exchange on operating experience and on other relevant safety and engineering areas and, in consultation with other relevant stakeholders, to explore mechanisms to enhance communication and interaction among operating organizations.
Action Plan on Nuclear Safety

IAEA Safety Standards

*Review and strengthen IAEA Safety Standards and improve their implementation*

- The Commission on Safety Standards and the IAEA Secretariat to review, and revise as necessary using the existing process in a more efficient manner, the relevant IAEA Safety Standards in a prioritised sequence.

- **Member States to utilize as broadly and effectively as possible the IAEA Safety Standards in an open, timely and transparent manner.** The IAEA Secretariat to continue providing support and assistance in the implementation of IAEA Safety Standards.
Action Plan on Nuclear Safety

International legal framework

*Improve the effectiveness of the international legal framework*

- States parties to explore mechanisms to enhance the effective implementation of the Convention on Nuclear Safety, the Joint Convention on the Safety of Spent Fuel Management and the Safety of Radioactive Waste Management, the Convention on the Early Notification of a Nuclear Accident and the Convention on Assistance in the Case of a Nuclear Accident or Radiological Emergency, and to consider proposals made to amend the Convention on Nuclear Safety and the Convention on the Early Notification of a Nuclear Accident.

- Member States to be encouraged to join and effectively implement these Conventions.

- Member States to work towards establishing a global nuclear liability regime that addresses the concerns of all States that might be affected by a nuclear accident with a view to providing appropriate compensation for nuclear damage. The IAEA International Expert Group on Nuclear Liability (INLEX) to recommend actions to facilitate achievement of such a global regime. Member States to give due consideration to the possibility of joining the international nuclear liability instruments as a step toward achieving such a global regime.
Action Plan on Nuclear Safety

Member States planning to embark on a nuclear power programme

Facilitate the development of the infrastructure necessary for Member States embarking on a nuclear power programme

- Member States to create an appropriate nuclear infrastructure based on IAEA Safety Standards and other relevant guidance, and the IAEA Secretariat to provide assistance as may be requested.

- Member States to voluntarily host Integrated Nuclear Infrastructure Reviews (INIR) and relevant peer review missions, including site and design safety reviews, prior to commissioning the first nuclear power plant.
Capacity Building

*Strengthen and maintain capacity building*

- Member States with nuclear power programmes and those planning to embark on such a programme to strengthen, develop, maintain and implement their capacity building programs, including education, training and exercises at the national, regional and international levels; to continuously ensure sufficient and competent human resources necessary to assume their responsibility for safe, responsible and sustainable use of nuclear technologies; the IAEA Secretariat to assist as requested. Such programmes to cover all the nuclear safety related areas, including safe operation, emergency preparedness and response and regulatory effectiveness and to build upon existing capacity building infrastructures.

- Member States with nuclear power programmes and those planning to embark on such a programme, to incorporate lessons learned from the accident into their nuclear power programme infrastructure; the IAEA Secretariat to assist as requested.
Action Plan on Nuclear Safety

Protection of people and the environment from ionizing radiation

Ensure the on-going protection of people and the environment from ionizing radiation following a nuclear emergency

- Member States, the IAEA Secretariat and other relevant stakeholders to facilitate the use of available information, expertise and techniques for monitoring, decontamination and remediation both on and off nuclear sites and the IAEA Secretariat to consider strategies and programmes to improve knowledge and strengthen capabilities in these areas. Member States, the IAEA Secretariat and other relevant stakeholders to facilitate the use of available information, expertise and techniques regarding the removal of damaged nuclear fuel and the management and disposal of radioactive waste resulting from a nuclear emergency.

- Member States, the IAEA Secretariat and other relevant stakeholders to share information regarding the assessment of radiation doses and any associated impacts on people and the environment.
Communication and information dissemination

*Enhance transparency and effectiveness of communication and improve dissemination of information*

- Member States, with the assistance of the IAEA Secretariat, to strengthen the emergency notification system, and reporting and information sharing arrangements and capabilities.

- Member States, with the assistance of the IAEA Secretariat, to enhance the transparency and effectiveness of communication among operators, regulators and various international organizations, and strengthen the IAEA’s coordinating role in this regard, underlining that the freest possible flow and wide dissemination of safety related technical and technological information enhances nuclear safety.

- The IAEA Secretariat and Member States, in consultation with the OECD/NEA and the IAEA International Nuclear and Radiological Event Scale (INES) Advisory Committee to review the application of the INES scale as a communication tool.
Research and development

Effectively utilize research and development

• Relevant stakeholders, with assistance provided by the IAEA Secretariat as appropriate, to conduct necessary research and development in nuclear safety, technology and engineering3, including that related to existing and new design-specific aspects.

• Relevant stakeholders and the IAEA Secretariat to utilize the results of research and development and to share them, as appropriate, to the benefit of all Member States.
CONCLUSION

The purpose of the Action Plan is to define a programme of work to strengthen the global nuclear safety framework. The success of this Action Plan in strengthening nuclear safety is dependent on its implementation through the full cooperation and participation of Member States and will require also the involvement of many other stakeholders.

Progress on the implementation of the Action Plan will be reported to the September 2012 meeting of the Board of Governors and the 2012 General Conference and subsequently on an annual basis as may be necessary. In addition, the extraordinary meeting of the Contracting Parties to the Convention on Nuclear Safety (CNS) in 2012 will provide an opportunity to consider further measures to strengthen nuclear safety.
Thank you
