

EMRAS – Theme 2
Remediation of Sites with
Radioactive Residues

Urban Remediation Working Group

8-11 November 2004

Vienna

Objective of the Working Group

**Testing and improving the prediction of
dose rates and doses to humans for
urban areas contaminated with
dispersed radionuclides**

Progress at this meeting

- **Distribution of full scenario description**
- **Discussion of modelling scenario**
 - **Information still needed**
 - **Endpoints for modelling exercise**
- **Discussion of models and modelling approaches**
- **Discussion of additional WG activities**

Initial modelling scenario: Chernobyl fallout in three Ukrainian towns

- **Pripyat**
 - Evacuated soon after accident, uninhabited since then
- **Polesskoe**
 - Remained inhabited after accident
- **Slavutych**
 - Built after accident on contaminated ground

Input information

- **Pripyat**
 - Measurements from May 1986
 - Information on decontamination efforts (1986-1988)
- **Polesskoe**
 - Dose rates in 1986
 - Information on specific buildings (1988)
 - Soil profiles (1989)
 - Information on remediation activities
- **Slavutych**
 - Initial contamination of area
 - Information on decontamination efforts (1988-1990)
 - Information on surrounding areas with no decontamination

Endpoints to be modelled

- **Dose rates and contaminant distributions**
 - **Specified locations in each town**
 - **With and without remediation**
 - **1986-1999**

Pripyat

Preliminary results: surface density

Plans for further work

- **Calculations and preliminary results by May 2005**
- **Next WG meeting in June 2005**
 - (dates not set yet)
- **Further discussion of models and modelling approaches**
- **Additional WG activities**
 - Annotated reference list
 - Collect information for hypothetical scenario(s)

Expected products

- **Interim products as needed**
 - Scenario description
 - CD with supporting information
 - Reference list
 - Other draft scenarios, working documents
- **One final report from WG**
 - Results from Ukrainian scenario
 - Results of other activities
 - Appendix with annotated reference list
