

Many thanks to the participants of TRS group and other WG (tritium, biota and freshwater)

for the delivery of more than 400 pages contributions

- Edited just before the meeting
- Commented by Mike Thorne (as an external reviewer)
  
- Availability of this report on Monday
- Work in small groups on Tuesday

To examine the different comments

To correct or modify when possible

To eventually report on difficulties

**The whole group meetings (Wednesday and Thursday) :**

- To examine chapter by chapter
- To precise if comments could be easily answered
- To discuss about difficult points
- To agree on harmonization of presenting data in tables (format)

**Contributions from 3 other Working Groups :**

- Specific activity models for tritium and carbone-14 (Phil Davis)
- Transfer to animals (Brenda Howard and Nick Beresford)
- Physical processes in freshwater (Luigi Monte)

**All these contributions in a good shape, close to finalization**

### Globally speaking :

- The different contributions are of very high quality
- The TECDOC is quite finalized
- Even if some improvements are needed
- Even if a few additional subsections will be added
- Even if a few additional subsections are still lacking (semi-natural environments : Arctic, Antarctic, alpine environments ; Uplands ; transfer to fruits - deadline to find contributors : end of year 2006)
- Agreement to deliver a final draft for the next interim meeting

**TECDOC will be finalized for June 2007**

## Concerning TRS

- Much more concise document
- At the initiative of the different contributors
- Following the structure
  - definition
  - description of the processes
  - parameters
  - limitations
  - parameter values
  - comments and recommendations (gaps)
- First draft needed for April
- Draft discussed during the interim meeting

**First draft of TRS for June 2007, finalized draft for November 2007**

## Publication in a special issue of JER

- A way to valorise the work of the different contributors
- Chapters / Subsections will be published in a special issue of JER
- 6 to 10 pages by papers, a little bit more than 20 papers
- An extraction of the TECDOC
- Opened to the different contributors (also other WG)
- Deadline for title and name of authors : Nov. 2006
- Deadline for the submission of papers : April 2007
- Review will begin in June 2007

**Papers finalized for end 2007**

## Next interim meeting organized in Paris close to the Eiffel Tower

- 3 days : 6, 7 and 8 of June 2007 (end of week)
- Devoted to the finalization of TRS
- WGL from the 3 other WG invited to participate, if possible

## International Conference on Environmental Radioactivity

- 26<sup>th</sup> of April, session available for EMRAS programme reporting
- TRS WG will provide a paper approximately entitled :

**“The major improvements in the revision of TRS 364”**
