

Many thanks to the participants of TRS group and other WG (tritium, biota and freshwater)

Work done at present :

- Last June interim meeting in Vienna
- The last six months home work

Objectives for this week :

- Complete the draft report and organize publications

More than 30 people attended the June interim meeting held in Vienna

Main objectives were :

- To examine and discuss contributions from the participants
- To examine and discuss contributions from other working groups (Common meetings in Vienna)
- To plan the work in the perspective to provide a first draft for this meeting

Situation at present :

- Quite all the contributions obtained from September to end of October
- Editing of a draft report nearly finished (contract with Mike Thorne)
- A rather big document (> 400 pages)

### This week :

- Final discussions chapter by chapter (small groups, if needed)
- To discuss, to harmonize, to ameliorate, to identify possibilities of synthesis
- To identify gaps
- To analyse and discuss with other working groups
  - Phil Davis for tritium and carbone-14 (Tuesday morning)
  - Brenda and Nick for transfer to animals (Thursday morning)
  - Luigi Monte for physical processes in rivers (Thursday afternoon)
- Preparation of publications : Tecdoc, special issue of JER
- Review by Mike Thorne for the future TRS
