

Many thanks to the participants of TRS group and other WG (tritium, biota and freshwater)

Work done at present :

- Last June interim meeting in Paris (draft for TECDOC, to begin with TRS)
- 400 pages TECDOC, quite finalized (see table of contents)
- 50 contributors
- A draft for TRS
- Papers for publishing in a special issue (review will start soon)

### Objectives for this week :

- To finalize the TECDOC
- To examine and discuss the draft version of TRS
- To examine and discuss contributions from other working groups
- To plan the work for TRS and JER

### This week :

- Final discussions chapter by chapter (small groups, if needed)
- To answer to the comments made by Mike Thorne
- This concerns TECDOC and TRS
- To discuss with other working groups (on Thursday morning)
  - Phil Davis for tritium and carbone-14
  - Brenda and Nick for transfer to animals
  - Luigi Monte for physical processes in rivers
- Reviewing of publications : special issue of JER
