

International Atomic Energy Agency

Mining and Mineral Processing Case Study

Alistair Cadden

Third Annual Meeting of the IAEA FaSa Project

**21-25 November 2011,
IAEA Vienna,**

Goals for 2011

- **Complete chapter**
- **Collect examples from Member States in defined format**

What are the criteria for a test case?

- **Completed safety assessment (or elements thereof) and a decommissioning plan available**
- **Information must be publicly available, or at least agreement that information can be made public**
- **Process has a number of the steps of the DeSa methodology**
- **Preferably the test case will be supported by an operator**
- **Reasonable chance of achieving outcomes expected from FaSa project**

Selection of Test Case

- **Cameco offered a number of sites in Canada which meet the selection criteria agreed in December**
- **Rabbit Lake (decommissioning plan updated 2009) has been used as basis for development of section**
 - includes mining and milling operations

Work completed over the past 6 months

Work for this week

- **Clean up text of chapter as currently written**
- **Edit case histories already received**
- **Collect case histories of what is actually done in member states**

Assistance Required

- **We are behind schedule for the MMPFTC**
- **We need Member States participation in working group**
- **Case studies from Member States**
