

International Atomic Energy Agency

FaSa Test case

Complex research reactor

Kurt Lauridsen, Denmark

Third Annual Meeting of the IAEA FaSa Project

**21 – 25 November 2011
IAEA, Vienna**

Outline of the presentation

- **Brief presentation of the reactor**
- **The results achieved at the previous annual FaSa meeting**
- **Results achieved at the intermediate WG meeting**
- **Work carried out since then**
- **Plans for this meeting**

The reactor

- **35 MW light water cooled pool-type operated between 1963 and 1997**
- **One of several nuclear facilities at a research centre**
- **Situated close to the centre of a city in an European country**
- **Under decommissioning. End date: mid 2012.**

The reactor building

Results achieved at the previous annual FaSa meeting

- **Structure of the report discussed, e.g.: should the description of the facility be in chapter 2 or 3? (ch. 2 chosen, so far)**
- **Major parts of the report edited**
- **Further writing and editing given to WG members as homework**
- **Decision taken on the – hypothetical – new end state:**
 - **Instead of complete clearance the reactor building is to be used for intermediate storage of waste from future decommissioning projects at the site**

Work done since the previous annual FaSa meeting

- Further detailed checking and editing of the draft report according to agreement at the meeting
- A very fruitful working group meeting was held in Grenoble 28 – 30 March

Results achieved at the intermediate WG meeting and thereafter

- Major parts of the report edited and re-shuffled
- Further writing and editing given to WG members as homework
- Contributions from the WG members collected and a new version of the draft report issued early September
- Further comments incorporated in the draft by mid-November

Planned work for this meeting

- Review of comments received and not yet incorporated in the draft report
- General review of the draft report and identification of editing still to be done
- Finalization of chapter 11, “Summary and Lessons Learned”
- Finalization of the report?

That should keep us busy for a couple of days
