

# Working Group One: Scenarios Plenary Closing

08 September 2013

**IAEA**

International Atomic Energy Agency

# Working Group Rationale

- Provide information to allow for a quick reference that may provide a starting point for developing future human intrusion scenarios.
- The group intends to support the overall project objective by developing scenarios.

# Working Group Objectives

- Provide an overview of the following in the form of a draft report:
  - Identify stylized human intrusion scenarios to be considered with distinction between near surface and deep geologic disposal
  - Potential impacts of a scenario on the disposal system and environment, and exposure scenarios
  - Provide a method to modify the stylized scenarios for additional purposes
- Support development of the HIDRA Report

# Working Group One Members

- **Frank Lemy** (Belgium) [frank.lemmy@fanc.fgov.be](mailto:frank.lemmy@fanc.fgov.be)
- **Reinaldo Gil Castillo** (Cuba) [gesr@cphr.edu.cu](mailto:gesr@cphr.edu.cu)
- **Bogdan Craciunoiu** (Romania) [bogdan.craciunoiu@cncan.ro](mailto:bogdan.craciunoiu@cncan.ro)
- **Alexandru Rodna** (Romania) [alexandru.rodna@cncan.ro](mailto:alexandru.rodna@cncan.ro)
- **Steven Dhlomo** (South Africa) [steven.dhlomo@necsa.co.za](mailto:steven.dhlomo@necsa.co.za)
- **Chris Markley** (USA) [christopher.markley@nrc.gov](mailto:christopher.markley@nrc.gov)

# Refine Section Focus

- Revisiting organization of report section
- Enhancing focus on human intrusion scenarios
- Providing guidance on tailoring generic human intrusion scenario to specific human intrusion scenario

# Scope of Work

- Identification of categories of potential scenarios of future human intrusion actions of radioactive waste disposal systems.
  - Identify stylized human intrusion scenarios
  - Identify method for scenario development

# Scenarios Identified

- Near-Surface Disposal Facility
  - Drilling
  - Excavation (building)
  - Excavation (roadway)
- Deep Geologic Disposal Facility
  - Drilling
  - Mining
  - Non-conventional Mining

# Accomplishment: Methodology

- Methodology
  - Disposal System Type
  - System Description\*
  - Intrusion Events
  - Impacts\*
    - Indicators
    - Transport
    - Exposure

\*Potential for measures incorporation

# Key Overlaps with Report Sections

- Discussion of probability (WG2)
- Discussion of system description (WG3)
- Role of human intrusion in the safety case (HIDRA)
  - Clarify HI is one component of the safety case

# Tentative Schedule

- Draft HIDRA report to the WG1 Members
  - Late November 2013
- Comments on draft HIDRA report from WG1 Members to WG1 Chair
  - February 2014
- Revised Scenarios section to WG1 Members
  - April 2014
- Comments on Scenarios section from WG1 Members to WG1 Chair
  - February 2014
- Core group meeting
  - September 2014

# WG1 Deliverable

- Draft report [TBD]

# Roles and Responsibilities

- Review and provide comments on report section (all)
- Proactively share information resources with the working group members (all)
- Coordinate with working groups 2 and 3 as necessary (CM)

# Possible Terms for Glossary

- Human intrusion
- Future human action
- Likelihood
- Probability
- Disposal system
- Disposal facility
