

SUPERSEDED STANDARDS AND OBSOLETE STANDARDS

The tables below provide hyperlinks to searchable pdfs of superseded publications and obsolete publications in the IAEA Safety Standards Series and in the IAEA Safety Series, organized by series number. Although these superseded publications and obsolete publications are not valid safety standards of the IAEA, their content may be of interest. The current safety standard that supersedes the earlier publication is also indicated, where this could be determined.

The IAEA Safety Series ran from 1958 to 1996 and comprised both safety standards and other safety related publications. The IAEA Safety Standards Series superseded the IAEA Safety Series in 1996. Several publications in the IAEA Safety Standards Series have since been revised and reissued.

These tables will be updated from time to time as safety standards are revised, and as information is gathered on the evolution of their content. Feedback on this project is welcome from current and former users of IAEA safety standards. Please email to safety.standards@iaea.org.

SUPERSEDED AND OBSOLETE PUBLICATIONS IN THE IAEA SAFETY SERIES

Altogether, over 230 different titles and editions of safety standards and other safety related publications were issued in the IAEA Safety Series. The first publication, a manual on Safe Handling of Radionuclides, was issued as IAEA Safety Series No. 1 in 1958. The last publication to be issued was IAEA Safety Series No. 120, a Safety Fundamental on Radiation Protection and the Safety of Radiation Source, published in 1996.

From 1958 to 1976, various categories of publication were issued in the IAEA Safety Series, including principles, codes of practice, regulations, guidance, manuals and reports from panels of experts. In general, the status of the text in each case is set out in the foreword to each publication.

From 1978 to 1990, four different categories of publication were issued in the IAEA Safety Series:

- IAEA Safety Standards (basic safety standards, regulations and codes of practice);
- IAEA Safety Guides (supplementing IAEA Safety Standards and recommending procedures that might be followed in implementing them);
- Recommendations (recommendations on safety practices);
- Procedures and Data (information on procedures, techniques and criteria pertaining to safety matters).

From 1990, five different categories of publication were issued:

- Safety Fundamentals (basic objectives, concepts and principles to ensure safety);
- Safety Standards (basic requirements which must be satisfied);
- Safety Guides (recommendations relating to the fulfilment of basic requirements);
- Safety Practices (practical examples and detailed methods);
- Safety Reports (independent reports from expert groups).
